

# MIS PROCESS SOLUTIONS

*Complete Engineering and Process Solutions Provider*

Process Control & Instrumentation / Design / Installation / Commissioning

# MiS PROCESS SOLUTIONS

Based in Scotland and with experience in the process, instrumentation and control industry, **MiS Process Solutions** aims to provide a complete range of process related solutions and services.

Our flexible approach coupled with our strong relationships with key industry manufacturers allows us to provide the most appropriate solution for each individual application, from single component to bespoke control systems. We pride ourselves in providing a first class and professional service including delivery and full technical backup.

At MiS Process Solutions, our experienced engineers have direct involvement from all angles of a challenging business, from the control room through to the boardroom.

Working with OEM's, contractors and end-users in the process industry, we aim to provide full project solutions from concept through to design, installation and commissioning with on-going support and maintenance provisions provided.

We pride ourselves in providing a first class and professional service including delivery and technical backup through to recommendation of appropriate solutions.
