

MOBILE DRUM FILLING MACHINE

Mobile Pneumatic Drumming Machine with battery, wheel-mounted drumming device with volumetric control suitable for cans, drums and tanks of various shapes and dimensions.

This volumetric mobile unit is installed on a strong stainless steel, wheeled trolley to have an easy and practical use.

Technical Features:

- Pneumatic Pump with 1,5" pipe.
- Pump Material : Pp - stainless steel – aluminum.
- Membrane's material: Nitrile, Teflon , Rubber, Silicon.
- Flow rate: viscosity 200 cps; 150 liter / min (1 drum 120 liters per minute).
- Dosage Precision: 200 gr.
- Dosage Gun with "start" button and manual closing valve.
- Chip machine control.
- Programming by touch screen operator panel.

Features of use:

- Machine control to microprocessor.
- Programming machine to color to touch screen operator panel.
- High precision disc volumetric counter.
- Automatic Conversion weight/volume.
- Automatic Tare and calibration procedure at the start.
- Lot number and net weight setting.
- Display of drum's net weight.
- Display of total lot weight.
- Display alarms system.
- Wrong dosage and low battery acoustic alarm.
- Battery power supply.
- Compressed Air : 300 nL/h 7 bar.
- Wall mounted Battery charger.
- Autonomy 4 hours.
- Weight: 50 kg.
- Dimensions: 500 x 900 x 800 mm.
